Ecological Modelling 82 (1995) 315–316

ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 82

VOL. 82 NO. 1 SEPTEMBER 1995

Spatial variability of digital soil maps and its impact on regional ecosystem modeling
R.G. Lathrop, Jr. (New Brunswick, NJ, USA) J.D. Aber (Durham, NH, USA) and J.A. Bognar (New Brunswick, NJ, USA) 1
Modeling the relationship between the asymmetry in crown display and local environment
K. Umeki (Kyoto, Japan) 11
Diversity and rank–abundance relationship concerning biotic compartments
I. Aoki (Osaka, Japan) 21
Mathematical models of lake Baikal ecosystem
E.A. Silow (Irkutsk, Russian Federation) V.J. Gurman (Pereyaslavl-Zalessky, Russian Federation) D.J. Stom, D.M. Rosenraukh and V.I. Baturin (Irkutsk, Russian Federation) 27
The adaptive significance of a lunar or semi-lunar reproductive cycle in marine animals
K. Omori (Ehime, Japan) 41
Regulation of a single-species fishery by taxation
S. Ganguly and K.S. Chaudhuri (Calcutta, India) 51
The role of uncultivated hosts in the spread of pyrethroid resistance in *Helicoverpa armigera* populations in Andhra Pradesh, India: a simulation approach
A.D. Madden, J. Holt and N.J. Armes (Chatham, UK) 61
Spatial model error analysis using autocorrelation indices
G.M. Henebry (Manhattan, KS, USA) 75
Correlation between models of population dynamics in continuous and discrete time
L.V. Nedorezov and B.N. Nedorezova (Novosibirsk, Russian Federation) 93
State analysis of ecological models: model reactions to parameter change
N.K. Luckyanov, W.P. Cropper, Jr. and M.A. Harwell (Miami, FL, Gainesville, FL, USA) 99

Short Communication
Addendum to "Picoplankton and marine food chain dynamics in a variable mixed layer: a reaction–diffusion model"
M. Hadfield (Wellington, New Zealand) S.K. Kumar (Palmerston North, New Zealand) W.F. Vincent (Laval, Canada) P.C. Austin and G.C. Wake (Palmerston North, New Zealand) 105

VOL. 82 NO. 2 OCTOBER 1995

A soil water-balance 'bucket' model for paleoclimatic purposes. 1. Model structure and validation
S.P. Evans and M. Trevisan (Piacenza, Italy) 109
A soil water-balance 'bucket' model for paleoclimatic purposes. 2. Model application to late Holocene climate
S.P. Evans and M. Trevisan (Piacenza, Italy) 131
The analysis of growth parameters of Russian boreal forests in warming, and its use in carbon budget model
A.O. Kokorin and I.M. Nazarov (Moscow, Russian Federation) 139

A mechanistic model of the effects of light and temperature on algal primary productivity
P. Duarte (Monte de Caparica, Portugal) 151
A review of the generic computer programs ALEX, RAMAS/space and VORTEX for modelling the viability of wildlife metapopulations
D.B. Lindenmayer (Canberra, A.C.T., Australia), M.A. Burgman (Creswick, Vic., Australia), H.R. Akçakaya (Setauket, NY, USA), R.C. Lacy (Brookfield, IL, USA) and H.P. Possingham (Adelaide, S.A., Australia) . . 161
Theoretical comparisons of individual success between phenotypically pure and mixed generalist predator populations
L. Provencher (Lexington, KY, USA) and S.E. Riechert (Knoxville, TN, USA) 175
An unified model for the different phases of growth of microbial populations in a closed system
D.-S. Liu, Z.-G. Li, Z.-S. Wang and Y.-H. Pan (Nanjing, People's Republic of China) 193

Short Communication
A method for downscaling global climate model calculations by a statistical weather generator
B. Oelschlägel (Bad Lauchstädt, Germany) 199

Modelling of Geo-Biosphere Processes
Letter to the Editor
Unbias the evaluation of soil hysteresis effects on transport
R.E. Smith (Fort Collins, CO, USA). 205

Book Reviews 207

VOL. 82 NO. 3 NOVEMBER 1995

Validation of a fish habitat model for lakes
H.G. Stefan, M. Hondzo (Minneapolis, MN, USA), J.G. Eaton and J.H. McCormick (Duluth, MN, USA) . . 211
Flow-indices characterizing eutrophication in lake-ecosystems
I. Aoki (Osaka, Japan) 225
Models to predict organic content of lake sediments
L. Håkanson (Uppsala, Sweden) 233
Stability analysis of a nonhomogeneous Markovian landscape model
B.-L. Li (College Station, TX, USA). 247
Flow- and locomotion-induced pattern formation in nonlinear population dynamics
H. Malchow (Geesthacht, Germany) 257
Hierarchical object-oriented design of a concurrent, individual-based, model of a pelagic Tunicate bloom
Ph. Laval (Villefranche-sur-Mer, France) 265
Foraging in flocks: non-spatial models may neglect important costs
G.D. Ruxton (Edinburgh, UK) 277
Modelling of two-dimensional spatial effects on the spread of forest pests and their management
J.W. Wilder, I. Christie and J.J. Colbert (Morgantown, WV, USA) 287
Decomposing tree annual volume increments and constructing a system dynamic model of tree growth
Y. Pan and D.J. Raynal (Syracuse, NY, USA) 299
